Omar,

The removal action is ongoing. Most of the containers have been sampled for hazcat. All but one of the vats was removed of liquids and decon'd. ERRS should begin addressing the lab tomorrow.

Remaining liquids within the vats, pits, and tanks will be removed during next several days. All work thus far including profile samples is anticipated to be completed by early - mid next week. Will have a polrep ready for distribution by late next week. Please don't hesitate to contact me for any further info.

V/r,

Hey Omar,

How are you? I have been on another project and I am copying Mark Hayes on your message who is the lead OSC at Lane right now. Thx.

**Subject:** Lane Plating Removal Action

Hi Bill,

I just wanted to check in with you on the progress of the removal action. Are there any PolReps available memorializing response actions? Our Site Assessment folks are completing an SI report and are looking for any documents that they should include as references for the removal action.

Let me know how we may help.

Thanks!

Omar.
